U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/255,222

Art Unit: 1724

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sargent et al. 5,234,466. It is submitted that Sargent et al. disclose (see col. 1 lines 54-61 and col. 3 lines 4-13) a method for adjusting the pH of a process stream or solution of a papermaking process as recited in the instant claims, respectively.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindstrom et al. in view of Sargent et al. 5,234,466.. Lindstrom et al. (see col. 1 line 55 through col. 2 line 60) disclose that it is known in the art to regulate the pH value of a papermaking process solution with aluminum sulfate. The claims differ from Lindstrom et al. by reciting the addition of urea sulfate. Sargent et al. disclose (see col. 1 lines 54-61 and col. 3 lines 4-13) that it is known in the art to decrease the amount of acid

Application/Control Number: 09/255,222 Page 3

Art Unit: 1724

required by a papermaking process, or adjust the pH of a process stream or solution of a papermaking process stream by the addition of urea sulfate. It would have been obvious to one skilled in the art to modify the method of Lindstrom et al. by addition of urea sulfate in view of the teachings of Sargent et al., to aid in adjusting the pH of the stream or solution.

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter A. Hruskoci whose telephone number is (703) 308-3839. The examiner can normally be reached on Monday through Friday from 6:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. David Simmons, can be reached on (703) 308-1972. The fax phone number for this Group is (703) 305-7718.

Application/Control Number: 09/255,222

Art Unit: 1724

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0651.
